WELCOME TO BELL MORE AROMATICS

We serve the world with our precious and life adorning chemicals. We make nature to flow through our funnels and nurture essences, flavors, synthetic essential oils, fragrances and chemicals.

WHO WE ARE?

"We are silent partner in successful product"

We make the chemicals that are used in the most successful products and in different popular brands. We are making them so, through our hard-earned research. We are working behind their popularity and success in the market. So, we are silent partner in successful products.

Bell More Aromatics is an integral part of every successful flavors, fragrances and chemicals. We are leading the crux essence, flavor and chemical industry of the world from Pakistan. We also prepare new and unique products for our customer. We adhere with utmost highest food quality and safe standards through quality products by design and maintaining rigorous quality assurance, quality control and trace-ability.

WHAT WE DO?

Nature nature give us oppurtunity and we use it to produce flavors, fragrances and synthetic essential oils. We make them useable and everlasting by converting them into life caring products. These chemicals are used as preservatives and make our products freshening for the senses of taste and smell.

We have years of experience to bring these aromas and essence into life. We prepare essence for rich taste and chemicals to preserve food. Our food preserving chemicals are laboratory tested, harmless and Halal products free from Ethyl alcohol.

HOW WE DO THIS?

We do this with best working equipment. The best can only be produced by the best. We are fully equipped with the latest gadgets available in the market. The whole set of resin plant includes reactor, vertical fractionating column, horizontal condenser, water storage tank, oil spill tank and piping (dilution kettle). All parts of the equipment that contact with the material are all made by stainless steel.

We use best quality densimeters to measure the specific gravity of liquids. The accuracy of our dilatometers is 100%. We use hygrometers to keep humidity under control. The strength of solutions we used in our products is measured through osmometer. The viscosity of liquid used in chemical reactions is measured through high quality viscometer. All these tests and top quality of equipment is used to meet our customer's specific needs.

THE MESSAGE FROM CEO

Welcome to the brand of food-flavors, odor-fragrances, chemicals and synthetic essential oils. A brand which has no parallel in consumer's satisfactions.

Bell More Aromatics is the realization of my dreams. From the very first day, the challenges rolled and rolled in. But I had to stay and cope with those challenges. I believe that challenges come to make us, not to break us. Passing through the winding path, today Bell More Aromatics is leading the flavors, fragrances, chemicals and synthetic essential oils industry from the front.

Dr. Khalid Mahmood

CEO

GOAL

Securing customer's 100% satisfaction through reliability and our solution-providing skill.

VISION

“Bring to the Light of Nature”

Quality products, quality assurance and standard form are our tools in achieving our vision. Nature is hiding so many booties for man. It is we who bring light to the hidden benefits and potential of nature. We harness these natural treasures to the best interest of our client's requirements. We are committed to provide our prestigious customer what remains behind the smoke screen from others by bringing light to these natural benefactors.

MISSION

“To provide the finest quality products to our customers”

We are innovating for our consumer’s finest senses of taste and smell through continuous market research. We never compromise on quality. As the phras goes on that compromise on quality means losing the customers.
